

HELP US MAINTAIN A HEALTHY PARK...

- **DO NOT BRING SICK CHILDREN**

Children who have known cold & flu-like symptoms (such as fever, vomiting, coughing, nasal drainage, sore throat, or diarrhea) or possible contagious conditions (such as a rash) should not be in the Park for at least 24-hours following the end of the symptoms. Children who vomit in the Park must leave.¹

- **TAKE A BREAK FROM PLAYING TO EAT SNACKS/FOOD**

Consume all food & drink only in the picnic area, which has a hand wash station, table wipes, waste containers & brooms. Before returning to the play areas, put away food, wash your table & chairs & sweep surrounding floor area. Snacking outside of the picnic area or while playing is never okay in the Park.

- **WASH HANDS BEFORE & AFTER EATING ANYTHING**

Regular handwashing is the single most important means of preventing the spread of infections. <http://www.cdc.gov/handwashing/>
